There is insufficient evidence to recommend for or against the use of ivermectin for the treatment of COVID-19.

Further research is necessary.

The Working Group supports the following statement from the NIH:

The ILI/COVID Working Group of Western New York was formed in response to local variation in approach to the diagnosis and treatment of Influenza-Like-Illness and COVID-19 in the region. It is a collaborative effort of hospital systems, academic departments, independent practice associations, and insurers. The logos and signatures on this document represent the organizations’ support of this statement.
